Dear Jason

JP IT Solutions - Testimonial

All of my data was being stored in a Dropbox Cloud Service. This was fine but I was worried about the security of this as the servers are held in the USA and cyber-crime is increasing. I contacted Jason Parrington at JP IT Solutions. He visited me at my office, listened to my concerns and advised me of all my solutions.

After careful consideration I opted for the NAS onsite server solution. Jason supplied and installed the onsite server, which still allows me to work remotely from home and get access to my data in real time. I was so impressed with the service and products I recommend them to my clients and the excellent service continues.

Diamond PA Services have now instructed JP IT Solutions as our IT suppliers and we look forward to working with for many years to come.

I would highly recommend Jason and his team at JP IT Solutions for all your IT requirements.

Kind regards

Donna Redshaw
